SIMEON RICE

AEROSPACE & MECHANICAL ENGINEERING • PROPULSION SYSTEMS DESIGN

Cedar City, UT | (435) 263-2669 | simeonrice321@gmail.com | www.linkedin.com/in/simeon-rice-293456404 | Project portfolio

EDUCATION

Brigham Young University, GPA 3.87, Full Tuition Scholarship *Apr 2030*
Mechanical Engineering (BS), Aerospace emphasis
- BYU rocketry club
- BYU aeronautics club

Southern Utah University — SUCCESS Academy, GPA 3.92 *Apr 2023*
Associates of Science

SKILLS

Leadership • 3D CAD Modeling • Metal Fabrication • Calculus & Linear Algebra • Problem Solving • Time Management • Fast Learner • Customer Relations • Equipment Maintenance • Attention to Detail • Bilingual (English/Spanish) • Coding

EXPERIENCE

Team Lead — Supersonic RC Aircraft *Sept 2026 - Present*
Supersonic Boom Challenge
- Inspire and lead a team to fabricate and assemble a 25 kg supersonic RC aircraft, competing against other teams throughout the world
- Target: complete two Mach 1 flights in a single day with minimum repairs
- Design airframe and modify a mini turbojet engine to go past Mach 1

Propulsion Research Team Member *Jun 2026 - Present*
BYU Rocketry Club
- Design and build a hybrid rocket engine fueled by paraffin wax and liquid nitrous oxide
- Continue to improve thrust, max results so far are 620 lbs thrust
- Accompanying team in building and problem solving to launch in a rocket launch competition

Designer & Builder — Gluhareff Pressure Jet *Jul 2026 - Present*
Student Innovator of the Year (SIOY), BYU
- Acting as part BYU innovative competition, I am engineering a gluhareff pressure jet engine similar to a Pulse Jet engine
- Engine will run on propane, undergoing pyrolysis to increase pressure and combustibility, initial testing starting soon
- Designed fluids system and injector to achieve higher flow rate to increase performance
- Calculate effect of pyrolysis and resultant byproducts of the reaction, to reach 100 lbs of thrust
- More on this and other projects in project portfolio

Parts Fabrication & Assembly *Jun 2026 – Aug 2026*
Power Driven Diesel
- Fabricated and assembled precision diesel engine components in a fast-paced machine shop environment

Full-Time Foreign Service *Nov 2023 – Nov 2025*
Missionary Service for the Church of Jesus Christ of Latter-day Saints — Ecuador Guayaquil North Mission
- Led and trained incoming volunteers while serving in an immersive Spanish-speaking, cross-cultural environment for two years
- Built strong interpersonal and communication skills through daily one-on-one and group engagement with the public

Hydrogen Generator *September 2023*
Personal Project
- Researched and created a working hydrogen generator powered by electrolysis for a HHO torch
- Fabricated several prototypes and learned how to make and run a hydrogen generator, breaking water into hydrogen and oxygen using electricity

Engine Precision Parts Machinist *Aug 2022 – Oct 2023*
Power Driven Diesel
- Machined and manufactured precision parts for engine assembly
- Collaborated with a small production team to maintain tight tolerances and ensure part reliability

EXTRACURRICULAR & LEADERSHIP

National Honor Society; BYU Aeronautics Club; Volunteer staff, Timberline and Varsity All-Stars Camps; Leadership roles within religious organization; Quiz Bowl Team; Boy Scouts of America; Emery High School Band, Percussion (Marching, Pep, Honor)
